MORE WAYS TO FIND

Tile compatibility

You can find your Tile with both iOS and Android devices. You can also ask your Voice Assistant -- Amazon Alexa, Google Assistant, Xfinity, and Siri -- to find it for you.

The Mate has a QR code on the back as standard, it is a new addition that's part of Tile's new Lost and Found feature. If someone comes across your lost tile, they can scan the QR code, and it will give them the contact info you've provided to Tile, that should make it easier to return your lost item.
